TRADITIONAL SERIES

FREESTANDING WOOD STOVES

Keep small to large spaces warm and comfortable with the highly efficient and durable Vista, Super, and Summit woodstoves. Designed for exceptional heat output and long burn times, the Vista is an excellent choice for heating spaces from 500 to 1500 square feet, the Super - our most popular stove - for heating spaces up to 2000 square feet, and the Summit for larger spaces and long, cold winter nights.

SUPER LE - METALLIC BLACK DOOR WITH OPTIONAL ASH PAN

up to
1500
sq ft

PORCELAIN ENAMEL OPTIONS

Classic stoves are available in three porcelain enamel colors. Optional colors are available, please see Dealer.

Ivory

Ebony

Sunset Red

DECORATIVE TRIVET OPTIONS

Nickel

Metallic Black

All Pacific Energy Wood Stoves come standard with these industry leading features:

- High capacity baffle system
- Multi-port combustion air injection system
- Air wash system for super clean ceramic glass
- Inside and outside combustion air capable
- Floating firebox for extended stove life
- Single-Lever Air Control
- Mobile Home Approved

VISTA LE VISTA CLASSIC LE

For spaces up to 1500 sq. ft.

Heat Output Cord Wood

56,000 BTU

23,200 BTU EPA Test Fuel

Efficiency (HHV)	72%
Emissions	1.9 gm/hr.
Log Size (recommended)	16"
Log Size (max)	17"
Firebox Size	1.6 cu.ft.
Viewing Area	152 sq.in.
Max Burn Time (Approx)	6-8 Hours ¹
Certification	B415.1

SUPER LE SUPER CLASSIC LE

For spaces up to 2000 sq. ft.

Heat Output Cord Wood

72,000 BTU

38,200 BTU EPA Test Fuel

Efficiency (HHV)	71.3%
Emissions	1.8 gm/hr.
Log Size (recommended)	16"
Log Size (max)	18"
Firebox Size	2.1 cu.ft.
Viewing Area	122 sq.in.
Max Burn Time (Approx)	7-10 Hours ¹
Certification	EPA 2020

SUMMIT LE SUMMIT CLASSIC LE

For spaces up to 3000 sq. ft.

Heat Output Cord Wood

99,000 BTU

41,275 BTU EPA Test Fuel

Efficiency (HHV)	74%
Emissions	1.8 gm/hr.
Log Size (recommended)	18"
Log Size (max)	20"
Firebox Size	2.5 cu.ft.
Viewing Area	153 sq.in.
Max Burn Time (Approx)	9-12 Hours ¹
Certification	EPA 2020

VISTA LE

STANDARD FEATURES

Reliable, durable, catalytic-free technology
Extended Burn Technology (EBT)
304 Stainless Steel Baffle, Rails, Tubes and
Flame Shield
East-West Loading

DESIGN OPTIONS

Rich metallic black finish
Pedestal base
Legs: choice of three finishes
Arched door: choice of three finishes

VISTA CLASSIC LE

Porcelain enamel: choice of three colors
Legs: choice of three finishes
Arched door: choice of three finishes
Decorative trivet: choice of two finishes

PERFORMANCE OPTIONS

Temperature-Actuated Variable-Speed Blower
Easy-to-use ash disposal system (optional on
Vista; included with Vista Classic)

SUPER LE

STANDARD FEATURES

Reliable, durable, catalytic-free technology

Summit; included with Summit Classic)

¹Burn times depend on draft, fuel, loading, and user input.

BAFFLE SYSTEM

Pacific Energy leads the industry in premium clean burn technology. Our unique high capacity baffle system preheats secondary combustion air for an extremely effective reburn. By burning the combustible elements in the air, we improve our stove's environmental performance while significantly reducing the amount of wood consumed.

Pacific Energys Extended Burn Technologies

PERFORMANCE EFFICIENCY	BURN TIME		
	Combustion Air	Fuel Quality	Draft
			no EBT or ACMS
			EBT2
			ACMS

ACMS

The Advanced Combustion Management System (ACMS) is the next evolution of EBT. It further improves burn times, efficiency, and emissions by intelligently fine tuning combustion air.

EBT2

The second generation of Extended Burn Technology, the EBT2 is field proven to be highly effective at controlling the secondary burn system, extending burn times and reducing overall emissions.

Pacific Energy Secondary Combustion System

Pacific Energy's legendary secondary combustion system reburns the smoke from the primary fire making one of the cleanest, most reliable and maintenance free systems available. High quality stainless steel makes sure that you have years of trouble-free use. There is no bypass or catalytic combustors.

SELF SEALING ASH DUMP SYSTEM

Our self-sealing ash dump system, with its spring-loaded trap door provides a time saving, hassle-free ash removal solution that, frankly, has yet to be equaled. Pacific Energy's machined steel, spring loaded ash removal system is opened from outside the stove and closes automatically for safety and convenience when you're done.

KNIFE EDGE DOOR SEAL

A formed and welded knife edge opening creates a superior air-tight seal to the door gasket while strengthening the stove face.

DESIGN-A-FIRE

A SYSTEM BY PACIFIC ENERGY

Pacific Energy Wood Stoves are customizable in your choice of door and leg finishes. Available in Nickel, Metallic Black and Brushed Nickel.

FLOATING FIREBOX

All fireboxes are subjected to wild extremes of temperatures. Solidly designed with steel brick support rails, our legendary floating system allows key parts to freely expand and contract to drastically reduce metal fatigue and add years of life to the entire appliance. The high capacity stainless steel baffle (part of the clean-burning secondary combustion system) and the flame shield (which protects the stove top from intense heat) are integral components of our legendary floating firebox system.

AIR WASH

Pacific Energy developed the first effective air wash manifold systems, a design that flows pre-heated air to the glass surface to keep it clean. A refined design now creates a high-pressure zone in the center and forces air to flow from above and across the glass. Even at low air settings, we are confident that our air wash system is the most effective available. And that our glass doors are among the cleanest in the industry.
